Reduction of operating expenses

ABOUT FACILITIES MAINTENANCE CORP.

Facilities Maintenance Corp. (FMC) is a woman-owned small business headquartered in the heart of Arlington Virginia. We specialize in facilities maintenance and commercial janitorial services and currently service millions of square feet in the D.C. metropolitan area. FMC has the experience required to operate and maintain retail, government, commercial office, and mission critical sites. Our engineering division strives to keep expenses down by performing many tasks in-house. We are licensed to operate steam boilers and recognize that safety is always priority number one. Our cleaning division minimizes the impacts of our operations on the environment and we are currently undergoing Green Seal GS-42 certification. At FMC we understand that communication is key. We assign a dedicated point of contact for each site to simplify coordination of all work and ensure the seamless flow of information to our customers. Every site has a unique set of challenges and we excel at custom tailoring our services to fit your needs.
